Thank you for the great study support sessions. They helped me prepare really well for the exam.

THANK A TEACHER

I found these study sessions incredibly helpful and the posters and questions on the teams really helped with my revision, so thank you so much!

I just want to say a massive thank to the N5 maths study support as it really helped me to improve by moving up 3 grades and helping me to make sense of things alot more.

91%

said that the e-Sgoil Study Support programme helped with their exams

77%

said that attending the webinars made a difference to their final grade

Thank you so much for all your help, you gave me a different perspective on a lot and helped me massively, making me achieve an A.

It was great to have the study support as sometimes I didn't understand what my teacher was trying to explain but having another teacher explain it differently helped me understand it.

Thank you so much for your support. After my prelims i was expecting to fail my exams after getting 27% and didn't think it was possible to bounce back but you helped by making the physics simple to understand and interesting.

I'd also like to use this opportunity to thank you for the National 5 webinars last year..... I went from having gaps in my knowledge and failing past papers to getting an A1 in the exam. The webinars were so informative and really developed my knowledge and skills for all parts of the course. I would not be where I am today without your help.

(the webinars) really helped me understand some past topics I wasn't so sure with but the way they explained everything made it make much more sense to me. I also loved the atmosphere online and the way everything was chill and the personalities of the 2 teachers really made it seem safe and fun.
